Education

Bachelor of Arts, Computer Science & Studio Art, University of Virginia July 2023 – Present
Charlottesville, VA

Relevant Coursework: Data Structures, Algorithms, Software Development, Discrete Math, Digital Art I, II and III
Activities: Society of Asian Scientists & Engineers, Marketing Director | Human Data Design, Marketing Chair | Bengali Student Association, Social Chair | V Magazine, Design Team

Work Experience

Global Business Intern, Digital Design & Web Content, WR Systems / GeoNavigation Technologies June 2026 – August 2026
Newport News, VA
Selected for the VEDP Global Business Internship Program, a competitive placement program for Virginia college students.

- Built a B2B ecommerce storefront on Odoo, writing custom HTML, CSS, and JavaScript against Odoo's JSON-RPC API to implement tiered pricing logic and cart/checkout behavior the platform didn't natively support.
- Designed a customer portal from scratch (license management, download center, maintenance renewal flow), translating stakeholder requirements and hand-sketched wireframes into a working self-service interface.
- Conducted a UX audit and developed buyer personas and end-to-end customer journey maps for two enterprise user segments, using heuristic evaluation and journey research to redesign key pages so visitors could self-navigate to a purchase decision.

Web Design Developer, Student Financial Services December 2025 – Present
Charlottesville, VA

- Designed the SFS intranet homepage and 6+ supporting pages in Figma, turning dense policy and operational content into clear, scannable layouts.
- Built and maintained reusable Drupal components with JavaScript, staying within UVA branding constraints while cutting build time on future page updates.
- Ran two rounds of user testing with SFS staff and reworked navigation and content structure based on their direct feedback.

Digital Illustrator & Visual Artist, Iris Magazine August 2025 – Present
Charlottesville, VA

- Illustrate 3 hand-drawn pieces per issue in Procreate and Photoshop, turning writers' drafts into finished editorial art.
- Work through iterative sketch reviews with the editorial team to hit print deadlines each issue.

Projects

HeraKlue – AR Mythology Scavenger Hunt *May 2026 – June 2026*

- Built an AR scavenger hunt app in Swift, ARKit, and RealityKit blending Greek mythology with location-based AR, developed during a UVA study abroad program in Heraklion, Crete.
- Ran on-site usability tests with classmates and adjusted interaction flow and pacing based on survey feedback.
- Pitched and demoed HeraKlue at Bizrupt.

unphased – Cycle-Synced Productivity *September 2025*

- Won "Best Use of Auth0" for token-based authentication protecting sensitive health data, built on React, Node.js, PostgreSQL, and AWS.
- Designed a "bulletin board" interface in Figma using visual metaphors to destigmatize menstruation tracking.
- Translated Figma designs into high-fidelity React Native components for the app's full-stack logic engine.

Hoos in Love – Local Dating Application *November 2025 – Present*

- Co-designed a UVA-themed dating app with customizable "lawn doors" – personality stickers, involvement tags, and profile photos – in Figma.
- Built a shared React Native component library to keep development consistent and fast across the team.

Henna Hut – Booking Platform *July 2025*

- Built and coded hennahut.us from scratch in HTML5 and CSS3, with a booking questionnaire (bridal, home studio, part henna) to streamline client intake.
- Designed for mobile-first vertical scrolling, prioritizing quick access to booking.

Skills

Design & Prototyping: Figma, Photoshop, Illustrator, After Effects, Procreate
Development: React, React Native, Node.js, HTML5/CSS3, JavaScript/TypeScript, Swift, ARKit, Python, Java, Drupal, Odoo (JSON-RPC API), PostgreSQL, AWS, Auth0
Concepts: User Research, Wireframing, Rapid Prototyping, Responsive Design, Accessibility (WCAG)
Languages: Bengali, Hindi, English, Spanish (proficient)
